Project Phase Design-II Technology Stack(Architecture & Stack)

Date	15 October 2022
Team ID	PNT2022TMID45814
Project Name	Personal Expense Tracker
	Application
Maximum Marks	4 Marks

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table 1 & table 2

- Include all the processes (As an application logic / Technology Block)
- Provide infrastructural demarcation (Local / Cloud)
- Indicate external interfaces (third party API's etc.)
- Indicate Data Storage components / services
- Indicate interface to machine learning models (if applicable)

Table-1: Components & Technologies:

S.No	Component	Description	Technology
1.	User Interface	How user interacts	HTML, CSS,
		with application e.g.	JavaScript / Angular
		Web UI, Mobile App,	Js /React Js etc.
		Chatbot etc.	
2.	Application Logic-1	Logic for a process in the	Java / Python
		application	·
3.	Application Logic-2	Logic for a process in the	IBM Watson STT service
	_	application	
4.	Application Logic-3	Logic for a process in the	IBM Watson Assistant

		application	
5.	Database	Data Type, Configurations etc.	MySQL, NoSQL, etc.
6.	Cloud Database	Database Service on Cloud	IBM DB2, IBM Cloudant
			etc.
7.	File Storage	File storage requirements	IBM Block Storage
			or Other Storage
			Service or Local
			Filesystem
8.	External API-1	Purpose of External API used in	IBM Weather API, etc.
		the application	
9.	External API-2	Purpose of External API used in	Aadhar API, etc.
		the application	
10.	Machine Learning	Purpose of Machine Learning	Object Recognition
	Model	Model	Model, etc.
11.	Infrastructure (Server/	Application Deployment on	Local, Cloud Foundry,
	Cloud)	Local System / CloudLocal	Kubernetes, etc.
		Server Configuration:	
		Cloud Server Configuration :	

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open-Source	List the open-source	Technology of Opensource
	Frameworks	frameworks used	framework
2.	Security Implementations	List all the security / access controls implemented, use of firewalls etc.	e.g. SHA-256, Encryptions, IAM Controls, OWASP etc.
3.	Scalable Architecture	Justify the scalability of architecture (3 – tier, Micro-services)	Technology used

S.No	Characteristics	Description	Technology
4.	Availability	Justify the availability of application (e.g. use of load balancers, distributed servers etc.)	Technology used
5.	Performance	Design consideration for the performance of the application (number of requests per sec, use of Cache, use of CDN's) etc.	Technology used
